## DETAILED ACTION

### *Specification*

The disclosure is objected to because of the following informalities: The specification is missing the proper headings, e.g. BACKGROUND OF THE INVENTION, SUMMARY OF THE INVENTION, etc. Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 appears to be incomplete. For examination purposes, examiner has referred to originally submitted claim 12.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Daly et al. (US Patent Number 5,536,271).

Art Unit: 3733

Daly et al. disclose various embodiments of a ligament tensioning device comprising a base member, e.g. 36, comprising a first claw, e.g. 42, with a distal bearing surface, a second claw, e.g. 38, having a proximal part, e.g. 78, 280 and 282, and a distal part, e.g. 290 and 292, wherein the distal part is displaceable relative to the proximal part, wherein the distal part comprises a guide, at 292, comprising a scale, e.g. 296, a projection having catches, i.e. threads, formed on the proximal part (see column 10, lines 60-65), a locking device, wherein the locking device can pivot around an axis and a force display (see column 6, lines 7-34).

With regard to the statement of intended use and other functional statements, they do not impose any structural limitations on the claims distinguishable over Daly et al., which is capable of being used as claimed if one so desires to do so. *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the law of anticipation does not require that the reference "teach" what the subject patent teaches, but rather it is only necessary that the claims under attack "read on" something in the reference. *Kalman v. Kimberly Clark Corp.*, 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which a device is intended to be employed does not differentiate the claimed apparatus from prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892 for art cited of interest.
